ANTIAGING TECHNOLOGICAL INNOVATION

## NEW BIO-REPAIRING TECHNOLOGY

FOR FIRING THE SKIN AND RESTORING ITS DENSITY. THIS IS A SYNERGIC DUAL-ACTION TREATMENT THAT SYNCHRONISES ENDOTHERMY AND MESOTHERAPY USING COSMETICS ENRICHED WITH PLANT STEM CELLS.

redefines

RÖS'S Estética, a European leading company in beautician appliances, now brings MESOBIOLIFT RF into its technological family, as the most advanced equipment in its range of antiaging treatments. Its reparative mechanism stimulates the cells in all cutaneous strata, thereby activating their self-regenerating capacity. That intracellular action results in reconstruction of **the bio-redensifying network** that keeps our tissues secured. The skin responds naturally and progressively, showing a smooth and well-toned appearance.

THREE POWERFUL INGREDIENTS IN ALLIANCE TO TACKLE OLD PROBLEMS

THE ENDOTHERMAL ENERGY GENERATED BY MESOBIOLIFT RF RESULTS FROM A FUSION OF ELECTROMAGNETIC ENERGY AND DIRECT CURRENT. THIS NEW EMISSION HAS THE POWER TO PRODUCE CONTROLLED INTERNAL HEAT AND TO CARRY THE PLANT STEM CELLS FROM THE SUPREME CELL EMULSION TRANSDERMALLY DOWN TO THE DEEP-LYING LAYERS OF THE SKIN. THIS FORMULA IS EXTREMELY EFFICIENT IN CASES OF FLACCIDITY AND DEVITALISATION.

À LA CARTE TREATMENTS, INTUITIVE HANDLING, UNSURPASSABLE RESULTS

DERMAL TREATMENTS WERE UNTIL NOW PROGRAMMED IN PHASES: FIRSTLY, STIMULATING VASODILATION AND THEN CAUSING NUTRIENTS TO PENETRATE DOWN INSIDE THE SKIN.

WITH MESOBIOLIFT RF WE ACHIEVE BOTH OBJECTIVES AT THE SAME TIME. THIS NEW SYSTEM ACTS IN A SYNCHRONISED WAY FROM THE SURFACE AND FROM THE INTERIOR OF THE SKIN, WITH THE OBJECTIVE OF ACTUATING THE MECHANISMS THAT BOOST CELLULAR REGENERATION.

THIS REACTIVATION TAKES PLACE BOTH IN THE ORDINARY CELLS AND IN THE STEM CELLS, AN OUTCOME THAT PROVIDES ADDED VALUE TO OUR TREATMENTS.

THE TECHNOLOGICAL CHALLENGE OF THE MESOBIOLIFT SYSTEM: THE SYNCHRONISATION OF ENERGIES

The endothermal wave is a heat generator and optimum vehicle for releasing active ingredients into the skin. Its intensity can be adjusted according to the treatment required.

The creation of a single endothermal wave capable of synchronising two actions with complementary functions was the challenge taken on by our research and development department.

The result is a more modern and effective tool that multiplies the treatment possibilities and reduces treatment times.

The technology of MESOBIOLIFT RF is designed with the delicacy brought by our team of advisers and the practicality provided by our engineers. This results in an intuitive and versatile piece of equipment that takes extreme care of the skin and yet is powerful in its results.

THE BEAUTY TECHNOLOGY THAT PAYS THE GREATEST ATTENTION TO THE NATURE OF THE SKIN

We treat the skin – that distinguishing mark of beauty and health – with the utmost care and professionalism. The tissues of the dermis perceive endothermal energy with different intensity, according to their capacity for absorption.

The tissues most resistant to the passage of energy tend to heat up more quickly and intensely than the tissues that present less resistance to the passing of energy.

APPLICATOR DESIGNED WITH A DUAL OBJECTIVE: TO ENSURE SKIN SAFETY AND FACILITATE PROFESSIONAL WORK

Pilot light to indicate emission

Coaxial emission, so no awkward return electrodes needed

Resistive bipolar emission, for controlled and selective emission of energy

Ergonomic design. Energy emission triggered by pedal in order to leave the hands free for the application

The MESOBIOLIFT RF treatment protocol has been designed under strict medical control, taking into account all the variables that influence correct stimulation of the skin according to the zone treated and the degree of cutaneous ageing.

This working method prevents unnecessary aggressions to the skin, preparing it progressively to receive the amounts of energy that it can tolerate.

Professional protocol

<b>PHASE I</b>	Scanning from 1MHz to 3MHz	<b>Cutaneous preparation</b>	Controls the progressive temperature increase in the skin temperature. Keeps all cutaneous layers stimulated and receptive.
<b>PHASE II</b>	MESOBIOLIFT RF system	<b>Cellular activator</b>	Treatment in synergy
<b>PHASE III</b>	Radiofrequency at 3MHz	<b>Efficacy booster</b>	Circulatory activator to boost take-up of active ingredients

40 programming possibilities

in order to approximate as closely as possible to the needs of each person's skin.

Two energy applicators for facial treatments and one for body treatments.

Set parameters according to skin diagnosis, choose the right applicator and follow the protocol indicated by the intelligent software. And away you go! All that is needed now is your personal touch to achieve the very finest results.

## FACIAL TREATMENTS

With the passing of time, the cellular renovation of the tissues slows down and the skin loses elasticity due to weakening of the fibres (collagen and elastin, among others) that assist its recovery. The dermis becomes thinner and wrinkles tend to appear.

In facial treatments, the resistance offered by the tissues to the passing of current leads to a controlled increase in the tissue temperature in the dermis, while leaving the epidermis intact. This endothermal increase has a dual consequence:

1. Immediate activation of the blood circulation **Reception of Supreme Cell active ingredients and activation of cellular neogenesis**
2. Contraction of the collagen fibres **Immediate effect: tensing of collagen fibres in the subcutaneous tissue**  
**Progressive effect: formation of new elastic fibres**

IMPROVEMENT OF SKIN BIO-REDENSIFYING NET

FIRMING, FACE OVAL CORRECTION, IMPROVEMENT OF GENERAL ELASTIC TONE, IMPROVEMENT OF EXPRESSION LINES

Neck and chin

Crows feet

Nasolabial folds

IN BODY TREATMENTS, MESOBIOLIFT RF OFFERS A TREATMENT AT 1MHZ RADIOFREQUENCY.

Buttocks

Abdomen

Arms

## BODY TREATMENTS

In body treatments, Mesobiolift RF offers a treatment at 1MHz radiofrequency. Medical studies show that RF is one of the most suitable energy forms for treating flaccidity in difficult zones such as the inner side of the thighs and on the abdomen or arms. Its activating power induces a proliferation of dermal fibroblasts and improves the arteriovenous system of the tissues. A further side effect is that it drives a circulatory activation that improves drainage and furnishes the skin with an extra supply of oxygen and nutrients.

### SUPREME CELL ENRICHED WITH PLANT STEM CELLS

Plant stem cells contain molecular structures that human cells are able to recognise. Supreme Cell is the conductive emulsion for the endothermal wave, and it contains stem cells extracted from the nucleus of the argan fruit, a recognised cellular regenerator. It activates the neogenesis of the skin cells, reconstructing the net that holds our cutaneous tissue in place. Optimum for skins devitalised through lack of nutrients and now beginning to show signs of ageing.

### ENDOTHERMAL PENETRATION OF PLANT STEM CELLS, REGENERATIVE ACTION, TRIPLE EFFECT

Scientific studies demonstrate that electromagnetic emission has a direct effect on the cells in the skin, and more specifically on the organic stem cells present in all tissue strata. The stem cells are pluripotential and are especially receptive to this external stimulus. The endothermal wave of itself stimulates growth of the stem cells, but in addition the ionic interchange that it unleashes enhances the permeability of the cellular membrane, which means that the active ingredient (in turn enriched with structures readily recognisable to the skin cells) has a very much more efficient and speedy effect than when it is rubbed in by hand.

ANTIAGING TECHNOLOGICAL INNOVATION

RÖS'S Estética is a European manufacturer of professional aesthetic technology since 1978. Its mission is to share with beautician professionals the most innovative and efficient solutions in beauty devices. The objectives of our trademark are to provide value and offer ongoing service.

We place all our values at your disposal:

- | Knowledge and experience
- | Training plan and medical assistance
- | Guarantee of European manufacturing
- | After-sales service

We at RÖS'S are at the side of entrepreneurs to accompany them in their growth. Our entire team of professionals and our medical-beautician, commercial, marketing and technical departments are at your disposal.

RÖS'S, vocation for service

<b>MESOBOLIIFT RF</b>		Ref. 0028480
<b>DIMENSIONS</b>	Width	590 mm
